

Employee 1

Backend Engineer

Bengaluru, India • employee1@example.com • +91 90000 00001 • github.com/employee1

PROFESSIONAL SUMMARY

Backend Engineer with 4+ years of experience building scalable REST APIs and data-driven services using Python. Strong background in FastAPI, Django, PostgreSQL, Redis, Docker, and AWS. Experienced in API design, database optimization, authentication, asynchronous processing, testing, and production deployment. Comfortable working across the full backend lifecycle.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript
Backend	FastAPI, Django, Django REST Framework, REST APIs, Celery
Databases	PostgreSQL, MySQL, Redis
Cloud & DevOps	AWS (EC2, S3, RDS), Docker, GitHub Actions, Nginx, Linux
Tools	Git, Postman, Pytest, Swagger/OpenAPI

PROFESSIONAL EXPERIENCE

Backend Engineer | NovaStack Technologies | 2023–Present

- Designed and maintained FastAPI and Django services supporting customer-facing web applications.
- Built REST APIs for authentication, job management, user profiles, notifications, and reporting workflows.
- Optimized PostgreSQL queries and indexes, reducing average response times for high-traffic endpoints.
- Implemented Redis caching and Celery background jobs for asynchronous email and data-processing tasks.
- Containerized backend services with Docker and deployed applications on AWS using EC2, RDS, and S3.
- Added automated unit and API tests with Pytest and integrated CI checks using GitHub Actions.

Junior Backend Developer | CodeHarbor Labs | 2022–2023

- Developed Django REST APIs and integrated PostgreSQL databases for internal business applications.
- Implemented JWT-based authentication, role-based access control, validation, and error handling.
- Collaborated with frontend developers to integrate APIs with React-based interfaces.

SELECTED PROJECTS

Recruitment Management API

Built a backend platform for managing jobs, candidates, applications, and interview workflows. Used FastAPI, PostgreSQL, Redis, Docker, and AWS. Implemented role-based access control and documented APIs with OpenAPI.

Order Processing Service

Created an asynchronous order-processing service using Django, Celery, Redis, and PostgreSQL. Added retry handling, structured logging, and automated tests for core workflows.

EDUCATION

B.Tech in Computer Science and Engineering | APJ Abdul Kalam Technological University | 2018–2022

CERTIFICATIONS

AWS Certified Cloud Practitioner • Python Programming Certificate • REST API Development
